<sup>♦</sup> In the field of Computer Science, archival conference proceedings such as the Association for Computing Machinery's CHI, IDC, ICER, and SIGCSE are top publication venues. These are peer-reviewed publications with low acceptance rates (usually around 30%). Conference proceeding publications rival top journals in their selectivity, citations, and influence. Within the fields of human-computer interaction and computing education proceedings publications are considered on par with publications in a journal. Acceptance rates are shown in [ ]'s where available.
